

Hardy Diagnostics G60 15 x 100 mm plate

For use as a general growth medium for microorganisms.

Product Features:

- For use as a non-selective, general growth medium for the isolation and cultivation of microorganisms (bacteria, yeast, and fungi). Especially useful for performing colony counts. This medium is also recommended for use in the cultivation, storage, maintenance, and transportation of pure cultures of microorganisms.
- Polystyrene Petri plates feature raised rings for stacking ability and prevents sliding.
- Packaged in sleeves of 10 plates in a "breathable" cellulose bag that prevents build-up of condensation and excess moisture. Also available in a box of 100 dishes; see cat. no. G60BX.
- The Hardy Diagnostics manufacturing facility and quality management system comply with cGMP's and have achieved ISO 13485 certification as a medical device manufacturer.
